Write SQL query to solve the problem given below

- Consider a scenario in which you have to create a table called Nobel_win
 where you have given the information about the entity who has achieved
 nobel prize in a particular subject all over the world.
- Over here the table Nobel_win will contain attributes like year, subject, winner, country and category
- You need to use the sql commands to create the table given and to solve the problem given below.

```
CREATE TABLE Nobel_win(

years int ,

subject varchar(60),

winner varchar(60),

country text ,

category text
);
```
